About IVR

IVR, founded in 1877, is the unique international platform on which national organisations of inland navigation, transport insurance and surveyors as well as individual companies and individuals from these sectors in many European countries are represented. Also related areas of business such as lawyers, manufacturers, yards are represented.

Inland navigation plays an important role within the European transport and mobility system. IVR is coping with all topics within the common sphere of interests of its members. It is characterised by its neutrality and independence.

IVR's members form a unique network of key players in the international inland navigation sector as well as all related areas to exchange information and experiences in the broadest sense.

Main tasks & Priorities

Representation
- of the organisation at EU level, international river commissions and UNECE

Platform & Events
- Organisation of annual congress, workshops and colloquia

Loss prevention programs
- Engine Registration System
- Steering gear inspections
- Loss prevention inspections
- Publication of independent recommendations for loss prevention

Harmonisation and unification of law
- Realisation and implementation of international treaties in the field of carriage of goods and liabilities in inland navigation
- Recommendation of international conditions
- International transport documents
- Database of articles and case law regarding the relevant international treaties

IVR Ships Information System
- Maintaining an online database of European inland vessels
- Online access for ship owners to update ships data
- Providing data and statistics to policy makers and third parties

Mission IVR's main objective is the observation and representation of the common interests of the involved industries on the network of the major European inland waterways. Inland navigation plays an important role within the European transport and mobility system. IVR is coping with all topics within the common sphere of interests of its members. It is characterised by its neutrality and independence.

Vision IVR is the independent inland navigation data / information source for statistics and considered as the platform for discussing and analysing risks and consequences of legal and technical developments in the inland navigation industry.
